REAL CLIENT SUCCESS – PROFILE 1

A health care provider in the southwestern United States reduced AR days by 36% in 120 days. Challenged with limited coding training resources, the provider faced a high DNFB of 14 days and challenges with coding accuracy, productivity and revenue. The organization outsourced its coding function to nThrive, including coding management. nThrive improved coding accuracy and productivity, and encouraged collaboration with the provider's CDI specialists. After 120 days of outsourcing, the provider realized a **36% reduction in AR days** – five days – achieving the CFO's goal. Coding-related denials have been minimized, and accurate assignment of CC, MCCs, Severity of Illness and Risk of Mortality is now standard practice. After many months of being financially in the red, the provider is in the black.

REAL CLIENT SUCCESS – PROFILE 2

A rural hospital in Pennsylvania increased its coding accuracy to 98%. This hospital faced coder recruitment and performance challenges. The coders did not work their scheduled hours consistently, which threatened coding quality, increased DNFC backlogs, and delayed reimbursement. The hospital outsourced its coding function to nThrive and within nine months, inpatient and outpatient **charts were coded in less than 24 hours** and coding **accuracy is now up to 98%**.

"Excellent rapport between the health team and the nThrive coding team. Lots of collaboration. Turnaround on coding is **LESS than 24 hours!**"

– HIM Manager

"In large part due to nThrive's improvements in coding performance, our facility's overall financial performance **went from monthly losses to gains.**"

– HIM Director and Privacy Officer

ARE YOU...

Seeing an increase in bad debt and AR days?

Capturing every dollar to which you are entitled?

Facing reimbursement challenges that threaten your cash flow?

nThrive Patient-to-Payment™ solutions help you work smarter at every stage of the revenue cycle
