

## USER MANAGEMENT

Managing access to your data is taken care of entirely through DataRiver™. Allow practice managers to only view the metrics they need while maintaining the security and integrity of your data across your health system. Manage user access to reports, dashboards, and more.

## SPREADSHEET & AD-HOC ANALYSIS

DataRiver™ helps you think. Perform all kinds of “what-if?” & “why did it happen?” analysis at your pace with whatever data you choose.

You can analyze trends using our web-based reports, or slice, dice and dissect data using a Microsoft Excel pivot table interface. Or choose in-depth analysis using SQL Analysis Services with structured data tables to answer your toughest questions.

Our reports aren't static. Dive as deep as you wish into the data. Anyone can do it. And should you ever need to add more data to the mix, no problem! It won't require invasive IT surgery.

## SECURE CLOUD STORAGE

Sharing critical reports with your team and organization can be daunting. DataRiver™ provides secure cloud storage that can be accessed from your office or from your tablet while you're on the go. With its straightforward report sharing capability, you get the access you need to review and make decisions when it counts.

## PHYSICIAN DIRECTORY

DataRiver™ structures your physician roster into a managed directory where users can update physician details as they change. These changes are immediately updated in your central data warehouse so reports are always current, reflecting the latest information.

The Physician Directory also allows for custom reporting. Search by physician attributes such as specialty, NPI, and more to gather the information you need.

**DataRiver™**  
HEALTHCARE INTELLIGENCE PLATFORM

Transforming healthcare data into clear, actionable insights to maximize value and minimize cost.

## GOT DATA, NOW WHAT?

You have data coming at you from all sides, but regrettably it isn't providing the essential insights you need to strengthen healthcare delivery and financial performance across your healthcare continuum.

The DataRiver™ Business Intelligence platform organizes healthcare data from disparate systems to aid in enterprise-wide strategic planning. Its robust applications allow for deep assessment of your health system, hospital, and physician groups to drive improvements in productivity, quality of care, cost, and market growth.

DataRiver™ gives you more than just numbers on a page. Instead, it shows you how to look at your data in order to improve your health system's economics through empirically based business decisions.

We integrate and map disparate healthcare datasets into one system

Our proprietary algorithms are applied to the data to deliver analytic insight into every view

The DataRiver™ analytics platform powers all of our services & products to deliver deep, data-driven answers

## Consulting Services

Our consulting services involve much more than just a spreadsheet. Unlike others, our recommended strategies are data-driven and derived from quantitative analysis performed through our DataRiver™ platform.

### REVENUE CYCLE ANALYTICS

- |                          |                                 |

## Analytics Products

### PHYSICIAN ECONOMICS Ambulatory Care

#### PHYSICIAN ANALYZER

Comprehensive reporting and access to key productivity, physician cost, revenue cycle, and practice financial data at every level of the organization.

#### A10 PRACTICE ASSESSMENT

Identify the biggest revenue and cost opportunities across the 10 economic drivers of productivity, visit coding, rates, payer mix, revenue cycle, charge master, utilization, compensation, costs, and labor costs.

#### PHYSICIAN REVENUE ANALYZER

Comprehensive revenue cycle performance reporting and analytics for the ambulatory operation.

### HOSPITAL ECONOMICS Acute Care

#### SERVICE LINE ANALYZER

Gain deep visibility into hospital service line cost across inpatient, outpatient, and physician practice data as well as payer, DRG, physician, and patient level views.

#### DOWNSTREAM ANALYZER

Easily determine the downstream value of an employed physician, point-of-care location, service area, marketing campaign or any patient point of entry.

#### MARKET ANALYZER

Drill down to the finest possible detail into consolidated market data to access physician referral, population mix, and competitor mix within any given market.

#### HOSPITAL REVENUE ANALYZER

Comprehensive revenue cycle performance reporting and analytics for the acute operation.

### VALUE-BASED REIMBURSEMENT Transition from fee-for-service to value-based focus

#### MIPS PERFORMANCE

A fully EHR-integrated analytics product that incorporates both quality and cost metrics to pinpoint improvement areas.

#### PQRS SUBMIT

A data extraction and integration service that creates the fastest, most seamless experience possible.
